## Installation notes

Suggestions for replacing gaskets

- **Save old gaskets**

Recommend saving all seals and gaskets till your restoration is complete. This way you can verify the gasket / seals received match your originals. IF there are any difference between your originals and our kit I would be interested in hearing about it. I'm always learning. Contact me at [jamesfillmore@detroitmuscletechnologies.com](mailto:jamesfillmore@detroitmuscletechnologies.com)

- **Pictures**

Highly recommended to take digital pictures when removing old parts/gaskets.

- **Adhesives**

All gaskets can be attached using one of two adhesives.

For the gray charcoal foams or for applications where you don't want to "see" the adhesive, use 3M 77 Spray Adhesive. Available at most chain craft stores.

For all gray foam rubber (like taillight lense to housing gaskets) or any black foam rubber (like air grabber door to hood seals) use 3M Black Weatherstrip Adhesive. Available at most chain auto parts stores. Chrysler used very thin beads of this weatherstrip adhesive to hold gaskets in place during assembly. It's not necessary to provide a seal and will make cleaning or replacement difficult in the future. On any of the lamp lense gaskets I personally wouldn't use adhesive.
